

	Fall–Brandon Zebold		
<div>sculpture</div> <div>4</div>	Medium–flame cut steel		\$9,000
	<p>Zebold likes to use both positive and negative shapes in his art. For “Fall,” he cut out lovely, flowing, organic or natural shapes from a geometric, man-made, diamond shape. The cut-out organic shapes are the negatives and the diamond shape is the positive. You can see more examples of organic shapes cut out from geometric pieces on the three other Zebold sculptures displayed behind the Redmond Senior Center. You can make your own positive/negative sculpture by cutting out pieces from paper. What kinds of shapes would you cut out?</p>
